Name _____ # _____

Date _____ Science

Directions:

Think about the first step in the Scientific Method: observation.

Take a walk outside with your teacher and classmates. Collect **one** leaf that has fallen from a tree to the ground. Upon your return to class, examine the leaf. Think about and list 6 properties of the leaf.

In the space provided below, write a description of the leaf. Be sure to include at least 5 complete sentences that accurately describe the qualities. Include 4 listed properties of the leaf, and a conclusion based on the collected data.
