

Name _____

Date _____

Science

Directions:

Think about one of the following topics, and select one to work with. Write your chosen topic on the line below.

puppies

now

wind

pea

Chosen topic _____

Now, think about one question you would like to ask about your chosen topic (other than the example question). For example, let's say you chose the topic pea. A sample question could be "Why is a pea green?"

Next, write down your prediction, or hypothesis, as a reasonable explanation to your question.

Using at least 3-5 resources, (at least 2 Internet sources) collect data on your topic. Analyze your collected data to help define your original question.

What conclusion can now be made after you have completed your research?

Question: _____

Prediction: _____
